

Performance
PROGRAMMER

2001-2005 GM Truck 6.6 Diesel LB7 & LLY

JET Performance Products

17491 Apex Circle, Huntington Beach, CA 92647
(714) 848-5515 • Fax: (714) 847-6290
www.jetchip.com

GENERAL PREPARATION

1. Turn OFF all power draining accessories; Radio, Cell Phone chargers, A/C, etc.
2. Turn your headlights off when programming your vehicle for added safety against battery failure. See your owner's manual for vehicle specific information regarding your headlights.
3. Your vehicle may be equipped with daytime running lights and/or sensors that turn the headlights on automatically while the ignition is on. Please check your owner's manual for the proper procedure on temporarily disabling these lights to eliminate this extra drain on your battery during the programming process. This is sometimes done by pressing the "dome override" button two to four times or in the case of automatic headlights turning the headlight switch to the left.
4. Temporarily disable OnStar (If equipped)

To help prevent any disruption of the programming procedure you will need to temporarily disable the OnStar system in your vehicle. To accomplish this you will need to remove one or more fuse(s) associated with the OnStar system. The fuse panel will be located under the hood on the driver's side behind the battery.

When the OnStar system is disabled, the indicator light (on the dash or rearview mirror) will not be lit. Double check to make sure that this light does not come on while the key is in the ON position (engine not running).

**For 2001-2002 Vehicles Remove the following fuses:
SEO1 (Special Equipment Option, On Star)**

NOTE: For 2001-2002 GM VEHICLES: If the previous step did not turn off the OnStar light on the dash you will need to remove these four fuses from behind the fuse block access door on the drivers side edge of dash.

**SEO IGN (Special Equipment Option, Ignition)
RDO 1 (Audio System, OnStar)
RAP #2 (Rear Power Windows, Sunroof, Radio, OnStar)
SEO ACCY (Special Equipment Options/Accy)**

**For 2003-2005 Vehicles Remove the following fuses:
INFO (Vehicle Communications Interface module)
RADIO (Entertainment System)**

NOTE: For 2003-2005 GM VEHICLES: If a failure occurs during the reading of the stock program you will get an error message "**STOCK READ FAILED**" turn the ignition key to the off position, unplug the programmer and remove the following fuses: **FROM THE FUSE BLOCK UNDER THE HOOD Remove:**

**TBC BATT (Body Control Module)
TBC IGN 1 (Body Control Module)**

FROM THE FUSE BLOCK LOCATED ON THE DRIVERS SIDE EDGE OF THE DASH Remove:

**SEO ACCY (Special Equipment options/Accy)
TBC 2A (Body Control Module)
TBC 2B (Body Control Module)
TBC 2C (Body Control Module)
TBC ACCY (Body Control Module)**

INSTALLATION INSTRUCTIONS OVERVIEW

Your vehicle has onboard computers that control the engine and transmission. The JET programmer reprograms your factory computer according to your selections with JET Performance Products Tuning.

To reprogram your vehicle's computer, simply plug the programmer cable into the vehicle's diagnostic connector, located under the dash panel on the driver's side. Set the parking brake. Next, turn the ignition key to RUN but do not start the engine. It will then identify your vehicle and ask a series of questions on its LCD screen.

When completed, turn the key to OFF and disconnect the cable from the diagnostic connector. Now you're "Engineered for Power".

JET Performance Product's tuning can be stored in only one vehicle. When you install JET Performance Product's tuning program into your vehicle, the programmer reads and stores your vehicle's factory programming. You can use the Programmer to restore your stock programming if it should ever become necessary.

You may also reconnect your programmer at any time to modify the programming. Simply reconnect the JET Performance programmer, answer the necessary questions, and program your vehicle.

PROGRAMMING INSTRUCTIONS

1. Locate the Data Link Connector (DLC) under the driver's side of the dash panel.
2. Plug the Programmer cable into the DLC. Make sure the cable is plugged in completely to ensure a good connection.
3. Set the parking brake to turn off the DRLs (DayLight Running Lamps)

IMPORTANT:

- **DO NOT LEAVE THE VEHICLE WHILE PROGRAMMING IS IN PROGRESS.**
- **MAKE SURE THE VEHICLE BATTERY IS FULLY CHARGED BEFORE PROGRAMMING.**
- **THE KEY MUST REMAIN IN THE RUN POSITION, WITHOUT THE ENGINE RUNNING, DURING THE ENTIRE PROGRAMMING PROCESS.**
- **IF THE VEHICLE HAS BEEN PROGRAMMED USING ANOTHER MANUFACTURERS PROGRAMMER, YOU MUST RETURN THE VEHICLE TO STOCK PROGRAMMING BEFORE USING THE JET PROGRAMMER.**
- **DO NOT DISTURB OR UNPLUG THE CABLE UNTIL THE PROGRAMMER INSTRUCTS YOU TO DO SO.**

- **DO NOT OPERATE ELECTRICAL ACCESSORIES (RADIO, WINDOWS, WIPERS, ETC.) WHILE PROGRAMMING.**
 - **IF THE VEHICLE IS EQUIPPED WITH AN ONSTAR SYSTEM, MAKE SURE THE SYSTEM TEMPORARILY DISABLED. (See Page 1)**
 - **DO NOT ATTEMPT PROGRAMMING WHILE THE VEHICLE IS CONNECTED TO A BATTERY CHARGER.**
4. The programmer will perform some self tests and then the following will appear on the screen.

TURN IGNTN ON, PRESS ANY KEY

Now turn the ignition key to the RUN position (BUT DO NOT START THE VEHICLE).

Press any key and the following screen will appear:

**Y PROGRAMMING
N DTC READER**

5. Press **Y** to enter Programming Functions and continue with **step 6 UNLESS THE FOLLOWING MESSAGES APPEAR:**

- “NOT FOR THIS VEHICLE” Call JET Customer Service
- “SOFTWARE NEEDS TO BE UPDATED” Call JET Customer Service
- RESTORE FACTORY PROGRAMMING Y/N? This message will appear after you have previously updated your vehicle with the JET Programmer, answer **Y** to this option to return your vehicle to its stock programming answer **N** to continue.

Press **N** to enter Date Trouble Code Reader (DTC) Functions (see Page 8)

6. Press **Y** to install **JET EZ Programming** (The JET EZ Programming option is engineered to give you the best performance with the easiest installation. By selecting this option the JET Performance Programmer will download the most up to date JET Performance tuning software to increase horsepower and torque based on your fuel grade selection. In addition, automatic transmission equipped vehicles will get improved shifting patterns and increased shift firmness. JET EZ Tuning is a great choice when you want more power without the need for custom tuning.)

ENGINE TUNING

MODIFY ENGINE TUNING Y/N?

Press **Y** to **Modify Engine Tuning** and select **Towing Stage One**, **Towing Stage Two** or **No Towing Stage Three**.

(See Below for a detailed explanation of each tuning selection.)

TOWING STAGE ONE Tuning is to be used for vehicles that you intend to use for **towing weights GREATER THAN 6000 LBS**, the towing weight for your truck is specified by the manufacturer. Exceeding this recommendation may cause serious damage to your truck, do not exceed the recommended towing capacity. JET Performance Products, **WILL NOT** be responsible for any damage caused by exceeding the recommended towing capacity of your truck.

TOWING STAGE TWO Tuning is to be used for vehicles towing weights **LESS THAN 6000 LBS**, the towing weight for your truck is specified by the manufacturer. Exceeding this recommendation may cause serious damage to your truck, do not exceed the recommended towing capacity. JET Performance Products, **WILL NOT** be responsible for any damage caused by exceeding the recommended towing capacity of your truck.

NO TOWING STAGE THREE Tuning is the highest performance level available and is to **NEVER BE USED ON ANY VEHICLE THAT IS TOWING OR HAULING ANYTHING OF ANY SIGNIFICANT WEIGHT.**

WARNING: Using the Stage Three tuning while towing WILL CAUSE DAMAGE TO YOUR TRUCK. JET Performance Products will not be liable for any damage caused to your truck if you do not follow this warning!!!

7. Press **Arrow keys** to scroll through Engine Tuning options and press **Y** to select.

MODIFY SPEED LIMITER Y/N?

NOTE: *This option is not available on 2001 model years.*

This allows you to modify the factory speed limit that is programmed into your computer. Most vehicles have speed limiters based on the tires that are installed on the vehicle from the factory. Each tire has a speed rating that is indicated by a letter designation. For your safety and the safety of others never exceed the speed rating on your tires or the posted legal speed limit at any time. In the case where a reduced speed limiter is required, JET has included the option to lower the speed limiter.

8. Press **Y** to Modify Speed Limiter and continue with **step 9**. Press **N** to leave stock and continue to **step 10**.
9. Press **Arrow keys** to modify speed limiter based on the tire rating and press **Y** to select.

MODIFIED TIRE SIZE Y/N?

Use this selection to correct your speedometer if you have changed your tire size. You can select from 24 to 44 inch tire sizes in half inch increments.

NOTE: *If your vehicle is equipped with traction control, exceeding 34 inch tire sizes may cause the traction control to not work correctly. In ALL vehicles: Some tire sizes, depending on what gear is in the vehicle, may cause shifting problems even with the correct setting on the programmer. This usually occurs with tires larger than 38 inches.*

10. Press **Y** to correct for tire size changes and continue with **step 11**. Press **N** for no changes and continue with **step 12**.
11. Press **Arrow** keys to select correct tire size and press **Y** to select.

MODIFIED GEAR RATIO Y/N?

Use this selection if you have changed the gear ratio in the differential. The selections include both factory and aftermarket gear ratios that may or may not be available for your vehicle.

NOTE: This option is not available on 2001 model years.

12. Press **Y** to correct for gear ratio changes and continue with **step 13**. Press **N** for no changes and continue with **step 14**.
13. Press **Arrow** Keys to select correct gear ratio and press **Y**.

MODIFY CHOICES Y/N?

14. Press **Y** to modify choices (this will return you to the beginning of the programming selections) or Press **N** if choices are correct and programming will begin.
15. Programming has begun, **do not disturb the cable key position or operate anything in the vehicle during the programming process.**

NOTE: During programming, vehicles equipped with driver information centers will display various service messages - these are nothing to be concerned about and will go away when programming is complete.

16. When programming is complete, the Programmer will display Programming Complete, turn the ignition key off and unplug the cable from the Data link connector (DLC).
17. That's it! Programming is now complete. Please store your JET Performance Programmer in a safe dry place in it's original packaging. You will need the programmer in the future to return your vehicle to stock or modify your settings.
18. If you had to previously disable your On Star system, reinstall the fuses that you removed to the correct locations.
19. Start the vehicle and verify that the service engine light is **NOT** on. If your vehicle will not start, see **page 7** for details on what to do if your vehicle won't start after programming.
20. **PLEASE NOTE:** After programming your truck with the JET Programmer, your transmission will need to relearn the shifting patterns for the new tuning. During the first 30-50 miles the transmission will shift differently then it normally does. You must allow at least 30 miles for the transmission to relearn the shift patterns before towing anything.

WHAT TO DO IF YOUR VEHICLE WON'T START AFTER PROGRAMMING

In some vehicles with the Vehicle Anti-Theft System (VATS), the programming process will set an error in the VATS module which will prevent the vehicle from starting. To clear this error, disconnect the ground (-) cable from your battery for 30 minutes. Then reconnect the ground cable to the battery and start the vehicle.

JET DATA TROUBLE CODE READER INSTRUCTIONS

The JET Performance Programmer also functions as a Data Trouble Code (DTC) reader for GM OBDII equipped vehicles. This allows the user to read and clear any stored data trouble codes in the system.

We have included a list of DTC's so you will know what code is stored in your vehicle. (This list may or may not include all available codes for all vehicles. Check a factory repair manual for your vehicle.)

Please NOTE: The DTC reader included in the JET Performance Programmer is not designed to be a complete scan tool or a diagnostic device. It is included as a convenience only. The interpretation of these codes and there effects are best left to an experienced automotive technician. **The JET technical department WILL NOT help you interpret or diagnose any codes, please see your local dealer or technician.**

Connecting the JET Programmer DTC code reader:

1. Locate the Data Link Connector (DLC) under the driver's side of the dash panel.
2. Plug the Programmer cable into the DLC. Make sure the cable is plugged in completely to ensure a good connection.
3. The programmer will perform some self tests and then the following will appear on the screen.

TURN IGNTN ON PRESS ANY KEY

Now turn the ignition key to the **RUN** position but **do not start** the vehicle and the following screen will appear:

Y PROGRAMMING

N DTC READER

4. Press **N** to continue to the DTC reader function of the JET Programmer and the following screen will appear:

GET DTCS Y/N

5. Press **Y** to continue and get DTC's or **N** to continue to the clear DTC's screen.

If you selected **Y** and there are any **DTC's** stored in the system they will be displayed in numerical order, use the arrow keys to scroll through any stored codes. If no **DTC's** are found the message on the screen will read **NO DTCS** stored. You can press any key to continue to the **CLEAR DTCS** screen.

Press **N** and the programmer will return to the starting screen..

6. If there are **DTC's** stored and you want to clear them continue to the **CLEAR DTCS Y/N** screen and select **Y**.

 P0374 Timing Reference High Resolution Signal A No Pulses
 P0375 Timing Reference High Resolution Signal B Malfunction
 P0376 Timing Reference High Resolution Signal B Too Many Pulses
 P0377 Timing Reference High Resolution Signal B Too Few Pulses
 P0378 Timing Reference High Resolution Signal B Intermittent/Erratic Pulses
 P0379 Timing Reference High Resolution Signal B No Pulses
 P0380 Glow Plug/Heater Circuit "A" Malfunction
 P0381 Glow Plug/Heater Indicator Circuit Malfunction
 P0382 Exhaust Gas Recirculation Flow Malfunction
 P0385 Crankshaft Position (CKP) Sensor B Circuit
 P0386 Crankshaft Position (CKP) Sensor B Performance
 P0387 Crankshaft Position Sensor B Circuit Low Input
 P0388 Crankshaft Position Sensor B Circuit High Input
 P0389 Crankshaft Position Sensor B Circuit Intermittent
 P0400 Exhaust Gas Recirculation Flow Malfunction
 P0401 Exhaust Gas Recirculation (EGR) Flow Insufficient
 P0402 Exhaust Gas Recirculation Flow Excessive Detected
 P0403 Exhaust Gas Recirculation (EGR) Solenoid Control Circuit
 P0404 Exhaust Gas Recirculation (EGR) Open Position Performance
 P0405 Exhaust Gas Recirculation (EGR) Position Sensor Circuit Low Voltage
 P0406 Exhaust Gas Recirculation Sensor A Circuit High
 P0407 Exhaust Gas Recirculation Sensor B Circuit Low
 P0408 Exhaust Gas Recirculation Sensor B Circuit High
 P0410 Secondary Air Injection (AIR) System
 P0411 Secondary Air Injection (AIR) System
 P0412 Secondary Air Injection (AIR) Solenoid Relay Control Circuit Bank 1
 P0413 Secondary Air Injection System Switching Valve A Circuit Open
 P0414 Secondary Air Injection System Switching Valve A Circuit Shorted
 P0415 Secondary Air Injection System Switching Valve B Circuit Malfunction
 P0416 Secondary Air Injection System Switching Valve B Circuit Open
 P0417 Secondary Air Injection System Switching Valve B Circuit Shorted
 P0418 Secondary Air Injection (AIR) Pump Relay Control Circuit Bank 1
 P0419 Secondary Air Injection (AIR) Pump Relay Control Circuit Bank 2
 P0420 Catalyst System Low Efficiency
 P0421 Warm Up Catalyst Efficiency Below Threshold (Bank 1)
 P0422 Catalyst System Low Efficiency Bank 1
 P0423 Heated Catalyst Efficiency Below Threshold (Bank 1)
 P0424 Heated Catalyst Temperature Below Threshold (Bank 1)
 P0430 Catalyst System Low Efficiency Bank 2
 P0431 Warm Up Catalyst Efficiency Below Threshold (Bank 2)
 P0432 Catalyst System Low Efficiency Bank 2

P0433 Heated Catalyst Efficiency Below Threshold (Bank 2)
 P0434 Heated Catalyst Temperature Below Threshold (Bank 2)
 P0440 Evaporative Emission (EVAP) System
 P0441 Evaporative Emission Control System Incorrect Purge Flow
 P0442 Evaporative Emission (EVAP) System Small Leak Detected
 P0443 EVAP Purge Solenoid Valve 1 Control CKT
 P0444 Evaporative Emission Control System Purge Control Valve Circuit Open
 P0445 Evaporative Emission Control System Purge Control Valve Circuit Shorted
 P0446 EVAP Vent Solenoid Valve Control System
 P0447 Evaporative Emission Control System Vent Control Circuit Open
 P0448 Evaporative Emission Control System Vent Control Circuit Shorted
 P0449 Evaporative Emission (EVAP) Vent Solenoid Control Circuit
 P0450 Fuel Tank Pressure Sensor Circuit
 P0451 Evaporative Emission Control System Pressure Sensor Range/Performance
 P0452 Fuel Tank Pressure Sensor Circuit Low Voltage
 P0453 Fuel Tank Pressure Sensor Circuit High Voltage
 P0454 Evaporative Emission Control System Pressure Sensor Intermittent
 P0455 Evaporative Emission (EVAP) System Leak Detected
 P0460 Fuel Level Sensor Circuit
 P0461 Fuel Level Sensor Performance
 P0462 Fuel Level Sensor Circuit Low Voltage
 P0463 Fuel Level Sensor Circuit High Voltage
 P0464 Fuel Level Sensor Circuit Intermittent
 P0465 Purge Flow Sensor Circuit Malfunction
 P0466 Purge Flow Sensor Circuit Range/Performance
 P0467 Purge Flow Sensor Circuit Low Input
 P0468 Purge Flow Sensor Circuit High Input
 P0469 Purge Flow Sensor Circuit Intermittent
 P0470 Exhaust Pressure Sensor Malfunction
 P0471 Exhaust Pressure Sensor Range/Performance
 P0472 Exhaust Pressure Sensor Low
 P0473 Exhaust Pressure Sensor High
 P0474 Exhaust Pressure Sensor Intermittent
 P0475 Exhaust Pressure Control Valve Malfunction
 P0476 Exhaust Pressure Control Valve Range/Performance
 P0477 Exhaust Pressure Control Valve Low
 P0478 Exhaust Pressure Control Valve High
 P0479 Exhaust Pressure Control Valve Intermittent
 P0480 Cooling Fan Relay 1 Control Circuit
 P0481 Cooling Fan Relay 2 Control Circuit
 P0482 Cooling Fan 3 Control Circuit Malfunction
 P0483 Cooling Fan Rationality Check Malfunction
 P0484 Cooling Fan Circuit Over Current
 P0485 Cooling Fan Power/Ground Circuit Malfunction
 P0500 Vehicle Speed Sensor (VSS) Circuit
 P0501 Vehicle Speed Sensor Range/Performance
 P0502 Vehicle Speed Sensor (VSS) Circuit Low Input
 P0503 Vehicle Speed Sensor (VSS) Circuit Intermittent
 P0505 Idle Control System Malfunction
 P0506 Idle Speed Low
 P0507 Idle Speed High
 P0510 Closed Throttle Position Switch Malfunction
 P0512 Start Switch Circuit
 P0520 Engine Oil Pressure Sensor/Switch Circuit Malfunction
 P0521 Engine Oil Pressure Sensor/Switch Circuit Range/Performance
 P0522 Engine Oil Pressure Sensor/Switch Circuit Low Voltage
 P0523 Engine Oil Pressure Sensor/Switch Circuit High Voltage
 P0530 A/C Refrigerant Pressure Sensor Circuit Malfunction
 P0531 A/C Refrigerant Pressure Sensor Circuit Range/Performance
 P0532 Air Conditioning (A/C) Refrigerant Pressure Sensor Circuit Low Voltage
 P0533 Air Conditioning (A/C) Refrigerant Pressure Sensor Circuit High Voltage
 P0534 Air Conditioner Refrigerant Charge Loss
 P0550 Power Steering Pressure (PSP) Switch Circuit
 P0551 Power Steering Pressure Sensor Circuit Range/Performance
 P0552 Power Steering Pressure Sensor Circuit Low Input
 P0553 Power Steering Pressure Sensor Circuit High Input
 P0554 Power Steering Pressure Sensor Circuit Intermittent
 P0560 System Voltage
 P0561 System Voltage Unstable
 P0562 System Voltage Low
 P0563 System Voltage High
 P0565 Cruise Control On Signal Malfunction
 P0566 Cruise Control Off Signal Malfunction
 P0567 Cruise Control Resume Signal Malfunction
 P0568 Cruise Control Set Signal Malfunction
 P0569 Cruise Control Coast Signal Malfunction
 P0570 Cruise Control Accel Signal Malfunction
 P0571 Cruise Control Brake Switch Circuit
 P0573 Cruise Control/Brake Switch A Circuit High
 P0574 Vehicle Speed Too High - Cruise Control Disabled

 P1677 Driver 4 Line 7
 P1680 Driver 5
 P1681 Driver 5 Line 1
 P1682 Driver 5 Line 2
 P1683 Driver 5 Line 3
 P1684 Driver 5 Line 4
 P1685 Driver 5 Line 5
 P1686 Driver 5 Line 6
 P1687 Driver 5 Line 7
 P1689 Delivered Torque Circuit Fault
 P1690 ECM Loop Overrun
 P1691 Coolant Gage Circuit Low Voltage
 P1692 Coolant Gage Circuit High Voltage
 P1693 Tachometer Circuit Low Voltage
 P1694 Tachometer Circuit High Voltage
 P1695 Remote Keyless Entry Circuit Low
 P1696 Remote Keyless Entry Voltage High
 P1700 Transmission Control Module (TCM) Requested MIL Illumination
 P1701 Trans. MIL Request Circuit
 P1705 P/N Signal Output Circuit
 P1740 Torque Reduction Signal Circuit
 P1743 TP Signal from ECM
 P1760 TCM Supply Voltage Interrupted
 P1779 Engine Torque Delivered to TCM Signal
 P1780 Park/Neutra Position (PNP) Switch Circuit
 P1781 Engine Torque Signal Circuit
 P1790 Transmission Control Module Checksum
 P1791 Transmission Control Module Loop
 P1792 Transmission Control Module Reprogrammable Memory
 P1792 ECM to TCM Engine Coolant Signal
 P1793 Transmission Control Module Stack Overrun
 P1795 CAN Bus - Throttle Body Position
 P1800 TCM Power Relay Control Circuit
 P1801 Performance Selector Switch Failure
 P1804 Ground Control Relay
 P1810 TFP Valve Position Switch Circuit
 P1811 Maximum Adapt and Long Shift
 P1812 Transmission Over Temperature Condition
 P1813 Torque Control
 P1814 Torque Converter Overstressed
 P1815 Transmission Range Switch - Start in Wrong Range
 P1816 TFP Valve Position Sw.-Park/Neu. With Drive Ratio
 P1817 TFP Valve Position Sw.-Reverse With Drive Ratio
 P1818 TFP Valve Position Sw.-Drive Without Drive Ratio
 P1819 Internal Mode Switch - No Start/Wrong Range
 P1820 Internal Mode Switch Circuit A Low
 P1822 Internal Mode Switch Circuit B High
 P1823 Internal Mode Switch Circuit P Low
 P1825 Internal Mode Switch - Invalid Range
 P1826 Internall Mode Swith Circuit C - High
 P1831 PC Solenoid Power Circuit - Low Voltage
 P1833 A/T Solenoids Power Circuit - Low Voltage
 P1835 Kick-Down Switch Circuit
 P1836 Kick-Down Switch Failed Open
 P1837 Kick-Down Switch Failed Short
 P1842 1-2 Shift Solenoid Circuit Low Voltage
 P1843 1-2 Shift Solenoid Circuit High Voltage
 P1844 Torque Reduction Signal Circuit Desired by TCM
 P1845 2-3 Shift Solenoid Circuit Low Voltage
 P1847 2-3 Shift Solenoid Circuit High Voltage
 P1850 Brake Band Apply Solenoid Circuit
 P1851 Brake Band Apply Solenoid Performance
 P1852 Brake Band Apply Solenoid Low Voltage
 P1853 Brake Band Apply Solenoid High Voltage
 P1860 TCC PWM Solenoid Circuit Electrical
 P1864 Torque Converter Clutch Circuit
 P1868 Transmission Fluid Life
 P1870 Transmission Component Slipping
 P1871 Undefined Gear Ratio
 P1873 TCC Stator Temp. Switch Circuit Low
 P1874 TCC Stator Temp. Switch Circuit High
 P1875 4WD Low Switch Circuit Electrical
 P1884 TCC Enable/Shift Light Circuit
 P1886 Shift Timing Solenoid
 P1887 TCC Release Switch Circuit
 P1890 ECM Data Input Circuit
 P1890 Throttle Position Signal Input
 P1891 Throttle Position Sensor PWM Signal Low
 P1892 Throttle Position Sensor PWM Signal High
 P1893 Engine Torque Signal Low Voltage
 P1894 Engine Torque Signal High Voltage
 P1895 TCM to ECM Torque Reduction Circuit

WHAT TO DO BEFORE TAKING YOUR VEHICLE IN FOR SERVICE

If a problem occurs that may require you to take your vehicle to a mechanic or dealership for service, first remove the JET Program and program back to stock. If the problem goes away when you remove the JET Performance Product, call JET and we will troubleshoot the product. However, if returning to stock does *not* cure your problem, there is nothing wrong with your JET Performance Product and you will need to have your vehicle serviced.

Anytime a diagnostic machine is to be used, the vehicle must be back to stock. Diagnostic machines expect to find the original stock program and often cannot correctly analyze the problem if other devices are installed. Failure to reinstall your system back to stock can result in unnecessary and costly repairs not covered by JET. Before you have any work done on the vehicle that you feel may have been related to the JET Programmer, please call JET at 714-848-5515.

Limited Warranty

JET Performance Products warrants Chips, Modules and Programmers to be free from defects in material and workmanship under normal use and if properly installed. This limited lifetime warranty is to the original purchaser for as long as he or she owns the vehicle on which the product was originally installed, provided all information requested is furnished. If found to be defective as mentioned above, it will be replaced or repaired at the sole discretion of JET if returned prepaid along with proof of date of purchase.

All other products and services performed by JET are warranted in defects in material and workmanship for a period of 6 months from date of purchase. This warranty is to the original purchaser for as long as he or she owns the vehicle on which the product was originally installed. Repair, Replacement, or Credit will be based on the date of purchase. Costs for labor are specifically excluded and are the sole responsibility of the purchaser.

This warranty does not apply to Custom Programming or any product incorrectly installed, modified by the purchaser, or to any product that has been subjected to misuse, negligence or accident.

To obtain warranty service and Return Authorization Number, contact our Customer Service Department at 714-848-5515 between 8 am and 5 pm Pacific Standard Time, Monday through Friday.

Defective Products may be brought or sent prepaid (with Return Number) to JET Performance Products, 17491 Apex Circle, Huntington Beach, CA 92647.

Consumer Bill of Rights

The installation and use of the product does not void the new-vehicle warranty nor should it be cause for the vehicle to fail an emissions test. Notify the product manufacturer if either of these situations occur. If you are unable to adequately resolve either situation with the vehicle manufacturer, you may contact the Environmental Protection Agency (EPA) at 202-233-9040, if the vehicle manufacturer fails to honor emission-warranty claims, or the Federal Trade Commission (FTC) at 202-326-3128, if federal protection is denied.
