

Memcal Performance Chip Installation for GM Applications

1. Disconnect the negative battery cable.
2. Locate the ECM using the Vehicle chart and the ECM location chart.
3. Unplug the wiring harness to the ECM and remove the ECM from the vehicle.
4. Remove the metal cover on the top of the ECM with a nut driver, socket or screwdriver. These are normally 1/4 inch, 7 mm or Torx head screws.
5. Remove the stock chip from the ECM by pushing the retaining tabs on the each end of the stock chip away from the chip and this will push the chip out of the socket. (See photo 1)
6. Attach the stock chip to the JET chip as shown. Align the notch with the socket. (See photo 2)
7. Install the JET Performance Chip back into the socket in the ECM that the stock chip was removed from and press down firmly to seat it. (See photo 3)
