JET POWERTECH PULLEYS

PART # 90140

1. Remove alternator belt.

2. Remove belt and harmonic balancer. **Note direction of cast arrow**

3. Remove alternator pulley and spacer.

4. Install underdrive balancer with mark in same location as cast arrow. Install alternator pulley.

5. Install Gates belt #K060615   **Note:** you may cross reference the Gates belt # to any other brand of belt.

6. *With the JET pulley kit installed, a reduction in charging at idle is normal. It is best to drive in a gear sufficient to maintain 1500 rpm or greater in order to maintain a good charge in the battery. Avoid prolonged idle especially in hot weather or with AC or headlights in use.*
