JET Performance Products Dynamic Spectrum Tuner

Windows 10 Installation Instructions

If you are running Microsoft Windows 10, please install the Dynamic Spectrum Tuner on your PC as follows:

1. Insert the Dynamic Spectrum Tuner thumb drive into a USB port on your PC. Once the PC recognizes the thumb drive you will receive a 'Select to choose what happens with removable drives' message.

2. Click on this message to open the drive options screen. Under 'Choose what to do with removable drives' click on the 'Open folder to view files option. This will open the Windows File Explorer with the Dynamic Spectrum Tuner thumb drive.

	Setup will add shortcut icons to the If you do not want to use the defaul type a new name, or select an exist	t folder, you can either
	Shortcut folder:	•
	< Back Next >	Cancel

14. The setup program is now ready to install the Dynamic Spectrum Tuner. Click on the Install button to proceed with the installation.

Ready to Install	Setup now has enough information to start installing the software. If you would like to make any changes before continuing, click Back. To abort the installation, click Cancel. When you are ready to start installing the software, click on the Install button.
	K Back Install Cancel

15. When the installation is complete the Finished screen will be displayed. Click on the Finish button to complete the installation and close this screen. (The installation program may request that you restart your PC to complete the installation.)

- 16. Once the setup program has completed the program installation you will need to set both the Dynamic Spectrum Tuner and the JET Flash program to run in compatibility mode and as an administrator.
- 17. To set the Dynamic Spectrum Tuner to run in compatibility mode and as an administrator right click on the Dynamic Spectrum Tuner icon on your Desktop and select Properties from the popup menu.
